Title : Oracle Application Express 18:
Developing Web Applications

Vendor : Oracle

Version : DEMO

NO.1 Which set of components do you need to add breadcrumb navigation to an existing application?

- A. navigation list, breadcrumb region, and breadcrumb entries
- B. navigation list, breadcrumb, and breadcrumb entries
- C. breadcrumb, breadcrumb entries, and breadcrumb regions
- D. breadcrumb, breadcrumb entries, and navigation regions

Answer: C

NO.2 Lucy' created an interactive report on the EMP table. She wants to filter the report to show employees with JOB = SALESMAN'.

Employee ID	Last Name	Job	Salary	Department Name	Location
1000	SCOTT	ANALYST	4200	ACCOUNTING	NEW YORK
1001	BLAKE	MANAGER	4900	MANAGEMENT	NEW YORK
1002	CLARK	CLERK	2850	ACCOUNTING	NEW YORK
1003	ALLEN	SALESMAN	1600	SALES	NEW YORK

Which two options could Lucy perform to add an equals filter on the Job column?

- A. Click Actions > Filter and select Job as column, equal sign (=) as operator, SALESMAN as Expression, and then click Apply.
- B. Enter salesman in the search bar text box.
- C. Click the Search icon (magnifying glass) on the search bar, and enter SALESMAN in the search bar text box.
- D. Add a where clause to the SQL Query to restrict the records returned.
- E. Click the Job column and select salesman from the column filter list of values

Answer: A B

NO.3 RICK"has created an "editable interactive grid on a table that include four audit columns: CREATED, CREATED_BY UPDATED, and UPDATED_By.

The four audit columns are included in the report with read-only type set to Always.

How can Rick update all four audit column when a user inserts a row, and the UPDATED_BY column when a user updates a row?

- A. using "Enable" Dynamic Actions
- B. using default values on the report columns
- C. using After Header Computations
- D. defining an After Submit process

Answer: A

NO.4 Robin develops many apps In her workspace that use various APEX plug ins. Some apps use the same plug-In as other apps. When a newt* version of a plug-in is available, Robin has to update the plug-in in multiple apps.

How can Robin upgrade a plug-In once and have all other apps that use the same plug-in get updated at the same time?

- A. Run a SQL command to update the plug-In definition in each application.

- B. Write a PL/SQL package that she can reuse to update the plug-In definitions in each application.
- C. Update one of the plug-ins, and then click Push Update to update the other apps.
- D. Create a "Plug-ins Master" app where she stores all plug-ins and then subscribes the plug-Ins in all of her other apps to the plug-Ins In the "Plug-has Master" app.

Answer: B

NO.5 Maurice wants to have a report on employees, which shows only employees for the department selected in a select list Item.

He has created a report, called report_1, based on the EMP table. Above the region, he has defined a select list called p6_deptno.

Maurice has added the correct Where clause for report_1 and defined an "on change" dynamic action on p6_deptno to refresh the report_1 region.

When he runs the page, no data is displayed. Irrespective of the department selected.

What must Maurice do to get the page to work correctly?

- A. Add a set value action, before the refresh action, of type PL/SQL Expression with code of :P6_DEPTNO and items to submit to P6_DEPTNO.
- B. On the report_1 region, set page Items to submit to p6_deptno.
- C. In the "on change" dynamic action, set page Items to submit to p6_DEPTNO.
- D. In the "on change" dynamic action, set event scope to "dynamic."

Answer: C

NO.6 You want to use the session state value of a page item in the select statement for a report on another page.

What is the correct way to reference the value of a page item in a SQL statement?

- A. &PAGE_ITEM
- B. v('PAGE_ITEM')
- C. APEX_UTIL.GET_SESSION_STATE(p_item => 'PAGE_ITEM')
- D. :PAGE_ITEM

Answer: C

NO.7 Which three actions can be performed In Object Browser?

- A. Enable and disable constraints.
- B. Write a SQL statement to update data in a table.
- C. Review the storage clause lot a table or view.
- D. Enable and disable Indexes.
- E. Truncate a table.
- F. Download table data to XML.
- G. Review the SQL statement for an existing table.

Answer: A D E
